ABSTRACTED-PUB-NO: GB 2338823A

BASIC-ABSTRACT:

NOVELTY - An arc tube has a pair of molybdenum foils (12) that pinch sealed at both ends with a spherical portion (4a) of quartz glass tube in between. The

*Can this reference
be used?*

surface roughness of the molybdenum foils and the glass tube is no less than 1 micro m (reference of 0.08 mm) at a ten point average roughness.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM describes a method for fabricating the tube such that the gas pressure in the tube is 100 torr or less. Preferably the pinch seal is heated to 2000-2300 deg. C.

USE - Arc discharge lamps.

ADVANTAGE - The tube does not suffer from exfoliation between the molybdenum foil and glass in the pinch seals.

DESCRIPTION OF DRAWING(S) - The drawing shows a completed arc tube and the arc tube being pinch sealed.
